

Coleman®-Mach®

RV PRODUCTS

Our name stands for
quality.

RV Products

As the exclusive manufacturer of Coleman®-Mach® RV Air Conditioners and Heat Pumps, RV Products has delivered reliable, top-quality comfort products for more than 35 years. Founded in 1967 as part of The Coleman Company, RV Products is committed to maintaining total quality, down to the smallest detail. Maybe that's why Coleman®-Mach® has become the world's most popular brand of RV air conditioners.

RV Professionals

With 30 years under our belts, RV Products has manufactured more than 3 million units for a variety of small-space cooling applications. Our sales, engineering and customer service teams boast more than 500 years of combined experience, providing innovative small-space cooling solutions that raise the quality standards across the country.

RV Performance

With 17 models to choose from, RV Products offers cooling options for virtually any application. From 7,000 to 27,000 BTUs, Coleman®-Mach® RV Air Conditioners and Heat Pumps are sized to meet the cooling needs of every motor home, camper, fifth wheel or other recreational vehicle manufactured today.

RV Partners

At RV Products, we value our relationship with manufacturers, distributors and dealers, and remain committed to serving our customers with high-quality products designed for maximum efficiency. Our staff of sales engineers, field engineers and customer service specialists routinely work with manufacturers to design cooling systems for specialized applications and are dedicated to providing quality service after the sale.

Coleman-Mach®

CHILLGRILLE™

CEILING ASSEMBLY

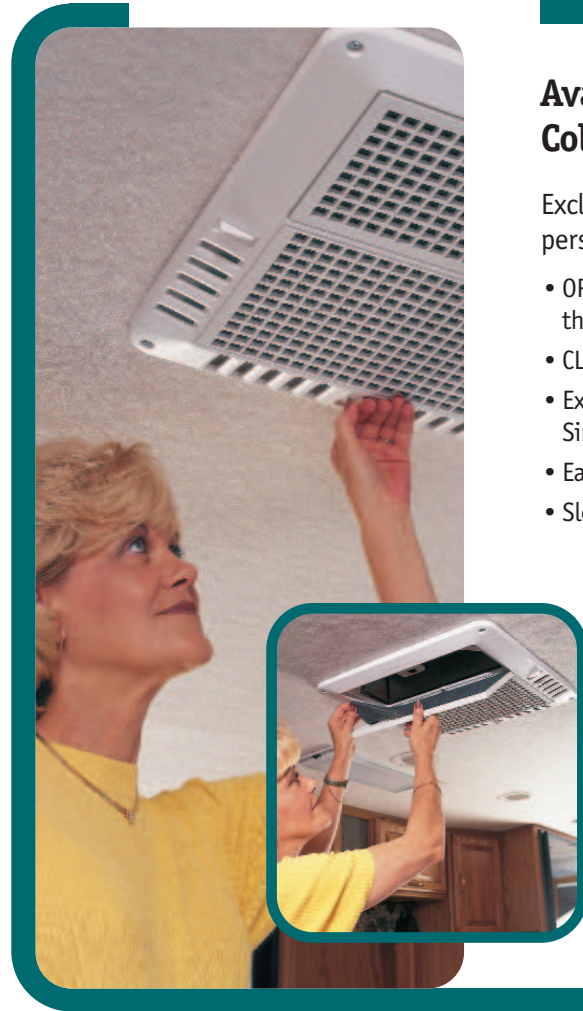

Available in both OEM and Aftermarket Versions for Coleman®-Mach® RV Air Conditioners

Exclusive DirectFlow Louver System provides cool air where you need it for personalized comfort in any RV!

- OPEN the specially designed louvers to channel cool air straight down into the cabin.
- CLOSE the louvers to divert cool air through your existing duct system.
- Exclusive EZReach Filter System provides quick access to the washable air filter. Simply loosen the fastener and swing out the grille to remove the filter.
- Easy installation with fully illustrated instructions.
- Slender profile provides plenty of overhead clearance.

Choose the Chillgrille™ that's right for your RV!

- Model 7330-6331 is designed for use with all 7000 Series Coleman®-Mach® air conditioners with lateral duct systems.
- Model 8330-6331 is designed for use with all 8000 Series Coleman®-Mach® air conditioners with lateral duct and straight-through duct systems.

To determine which model of Chillgrille™ you need, simply remove the existing plastic ceiling assembly inside your RV.

If the metal ceiling assembly frame looks like Picture A* and the electrical wire connection box is mounted on the frame as shown, purchase Model 7330-6331.

If the metal ceiling assembly frame looks like Picture B or Picture C, purchase Model 8330-6331.

**Picture A: purchase
Model 7330-6331**

**Picture B: purchase
Model 8330-6331**

**Picture C: purchase
Model 8330-6331**

*Note: If your frame matches Photo A and the electrical wire box is not mounted on the frame, you have a duct system that is not compatible with Chillgrille™.

Caution: Do not install Model 7330-6331 in vehicles where an auxiliary heat strip is used.
