# RVComfort.ZC™

**ZONE CONTROL THERMOSTAT**

## One thermostat for all your heating and cooling needs!

With the RVComfort.ZC™ Zone Control Thermostat, you can control up to four rooftop air conditioners or heat pumps – plus four zones of gas, hydronic or electric strip heaters and fans – all from one location! The system utilizes a series of advanced heat sensing devices which track temperatures in each of the four zones and activates heating or cooling as needed to maintain the selected temperatures. Zones can be turned on or off individually to save propane, electricity and money, so if you're spending more time in the front of your RV on a hot summer day, you can maintain a more comfortable temperature there and leave it warmer in unused areas.

With an attractive, Euro-style case and simple, user-friendly controls, the RVComfort.ZC™ is the easy way to stay comfortable all year long.

ZONE CONTROL THERMOSTAT

Control up to four  
**independent**  
heating and cooling zones!

**The RV Comfort.ZC™ Zone Control Thermostat can make any RV feel more like home.**

- Control up to four rooftop air conditioners or heat pumps, plus four zones of gas, hydronic or electric strip heaters and fans from one location.
- Simple, user-friendly design facilitates easy programming and operation.
- Attractive, Euro-style plastic case complements any RV interior.
- Easy-to-read, backlit LCD panel displays room temperature and operational modes for each zone. Displays in Fahrenheit or Celsius.
- Set-point memory for both heat and cool settings allows users to set and forget, even when the seasons change.
- Zones can be turned on or off individually to save propane and money.
- Backup heat engages automatically when thermostat is set to electric heat mode.
- Auto generator start, low-voltage lockout protection, anti-short cycle delay timer and freeze protection circuitry for added reliability.
